

# Analyzing the Neighborhoods in Mumbai for Starting a Restaurant

By: Shriram Buchkul

Date: June 11, 2024

# Introduction

- Mumbai is the financial capital of India and is one of the most densely populated cities in the world
- The multi-cultural nature of the city brings with it numerous cuisines from all over the globe
- Business owners and entrepreneurs might be looking to start a new restaurant in Mumbai
- The task is to identify neighborhoods that have the potential of being good locations for starting a new restaurant

Figure 1: Mumbai view

# Data Collection

- The following data was collected for this project:
  - Neighborhood data of Mumbai from [https://en.wikipedia.org/wiki/List\\_of\\_neighborhoods\\_in\\_Mumbai](https://en.wikipedia.org/wiki/List_of_neighborhoods_in_Mumbai)
  - Geographical coordinates of Mumbai and all neighborhoods in Mumbai using GeoPy and Geocoder libraries in python
  - Venue data for all neighborhoods in Mumbai using Foursquare API
- The data was then cleaned to produce the final datasets shown in the upcoming slides

# Dataset for Mumbai Neighborhoods

	Neighborhood	Location	Latitude	Longitude
0	Amboli	Western Suburbs	19.1293	72.8464
1	Chakala, Andheri	Western Suburbs	19.1084	72.8623
2	D.N. Nagar	Western Suburbs	19.1241	72.8325
3	Four Bungalows	Western Suburbs	19.1263	72.8243
4	Lokhandwala	Western Suburbs	19.1432	72.8249
5	Marol	Western Suburbs	19.1192	72.8827
6	Sahar	Western Suburbs	19.1027	72.8626
7	Seven Bungalows	Western Suburbs	19.1315	72.817
8	Versova	Western Suburbs	19.1377	72.8135
9	Mira Road	Western Suburbs	19.2657	72.8711

Figure 2: First 10 rows of Mumbai Neighborhood Dataframe

# Dataset for Top 10 Most Common Venues

	Neighborhood	1st Most Common Venue	2nd Most Common Venue	3rd Most Common Venue	4th Most Common Venue	5th Most Common Venue	6th Most Common Venue	7th Most Common Venue	8th Most Common Venue	9th Most Common Venue	10th Most Common Venue
0	Amboli	Indian Restaurant	Coffee Shop	Bakery	Bar	Asian Restaurant	Pizza Place	Sandwich Place	Bowling Alley	Bus Station	Bike Rental / Bike Share
1	Chakala, Andheri	Hotel	Indian Restaurant	Café	Fast Food Restaurant	Pizza Place	Asian Restaurant	Hotel Bar	Vegetarian / Vegan Restaurant	Restaurant	Gym
2	D.N. Nagar	Bar	Indian Restaurant	Pub	Gym / Fitness Center	Pizza Place	Lounge	Coffee Shop	Vegetarian / Vegan Restaurant	Snack Place	Gym
3	Four Bungalows	Pub	Café	Indian Restaurant	Gym / Fitness Center	Chinese Restaurant	Bar	Seafood Restaurant	Lounge	Vegetarian / Vegan Restaurant	Coffee Shop
4	Lokhandwala	Indian Restaurant	Chinese Restaurant	Café	Pub	Bakery	Bar	Italian Restaurant	Gym / Fitness Center	Coffee Shop	Asian Restaurant
5	Marol	Indian Restaurant	Hotel	Diner	Bakery	Dance Studio	Ice Cream Shop	Chinese Restaurant	Fast Food Restaurant	Restaurant	Lounge
6	Sahar	Hotel	Café	Indian Restaurant	Lounge	Gym	Asian Restaurant	Pizza Place	Seafood Restaurant	Restaurant	Falafel Restaurant
7	Seven Bungalows	Café	Pub	Seafood Restaurant	Chinese Restaurant	Pizza Place	Coffee Shop	Bar	Ice Cream Shop	Asian Restaurant	Bistro
8	Versova	Café	Ice Cream Shop	Beach	Pizza Place	Coffee Shop	Chinese Restaurant	Salon / Barbershop	Frozen Yogurt Shop	Bistro	Sandwich Place
9	Mira Road	Indian Restaurant	Convenience Store	Coffee Shop	Mexican Restaurant	Fast Food Restaurant	Food Truck	Motorcycle Shop	Movie Theater	Basketball Court	Bar

Figure 3: First 10 rows of top 10 most common venues for all neighborhoods

# Methodology

- **Data Visualization**

- Mumbai neighborhoods data was plotted for providing a better understanding
- The graph alongside depicts the number of neighborhoods in each location of Mumbai
- All neighborhoods on the outskirts of the city have been grouped as “Mumbai”
- Western Suburbs and South Mumbai contain the highest number of neighborhoods

Figure 4: Number of neighborhoods grouped by location

# Methodology Continued

- **Data Visualization**
  - The Folium library in python was used to visualize the spread of all neighborhoods across Mumbai

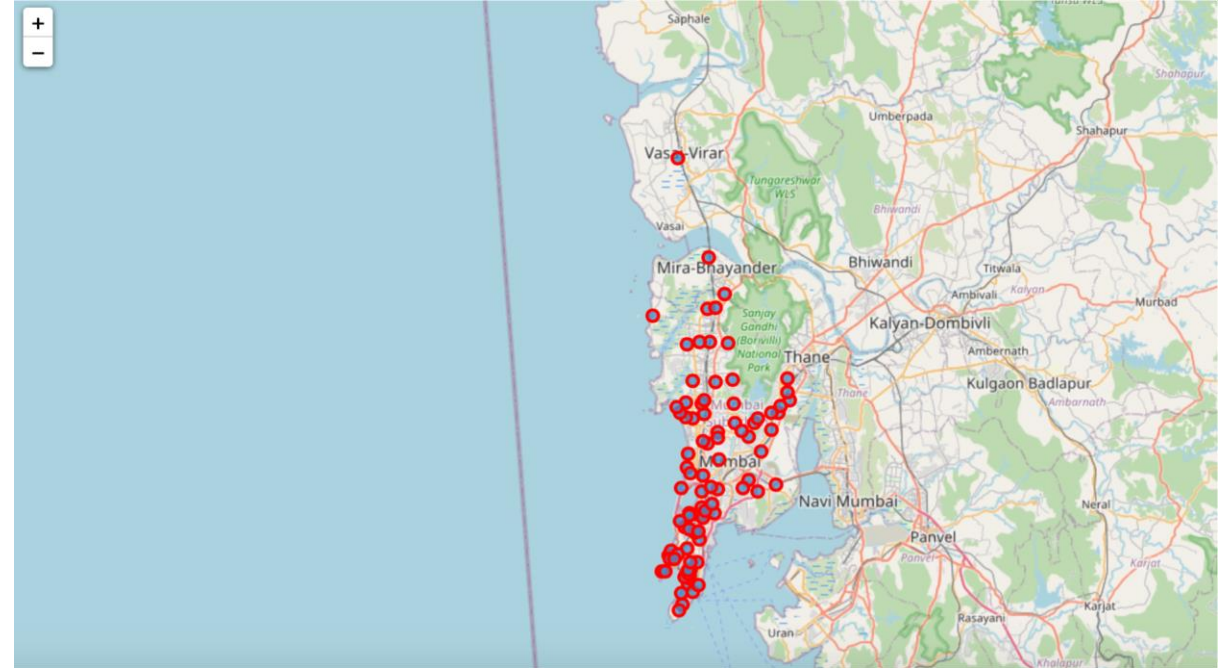

Figure 5: The neighborhood spread across Mumbai

# Methodology Continued

- **One-hot Encoding**

- One-hot Encoding was used to encode venue categories to numeric values with 1 if a venue belongs to a category and 0 if a venue does not belong to a category for all neighborhoods
- The average is then taken for all venue categories in a neighborhood to produce the dataframe shown

	Neighborhood	ATM	Accessories Store	Airport Terminal	American Restaurant	Antique Shop	Aquarium	Arcade	Art Gallery	Arts & Crafts Store	...	Trail	Train	Train Station	Vegetarian / Vegan Restaurant	Whisky Bar	Wine Bar	Wine Shop	Women's Store	Yoga Studio	Zoo

10 rows x 221 columns

Figure 6: One-hot Encoding  
resulting dataframe

# Methodology Continued

- **Unsupervised Learning Model**

- KMeans clustering was used to cluster neighborhoods in Mumbai based on venue categories
- The plot shows a maximum Silhouette Score for 5 clusters and thus the `n_clusters` parameter in KMeans clustering was set to 5

Figure 7: Silhouette scores for varying number of clusters in KMeans clustering

# Results

- Each neighborhood received a cluster label based on clustering by the KMeans algorithm
- The Cluster Label column along with the Location, Latitude, and Longitude columns were added to the top 10 most common venues dataframe to provide the final results
- This dataframe is shown on the next slide

# Results Continued

	Neighborhood	Location	Latitude	Longitude	Cluster Labels	1st Most Common Venue	2nd Most Common Venue	3rd Most Common Venue	4th Most Common Venue	5th Most Common Venue	6th Most Common Venue	7th Most Common Venue	8th Most Common Venue	9th Most Common Venue	10th Most Common Venue

Figure 13: Cluster 5

# Results Continued

- Visualization of neighborhood clusters was done using Folium in python
- Different clusters correspond to different colors

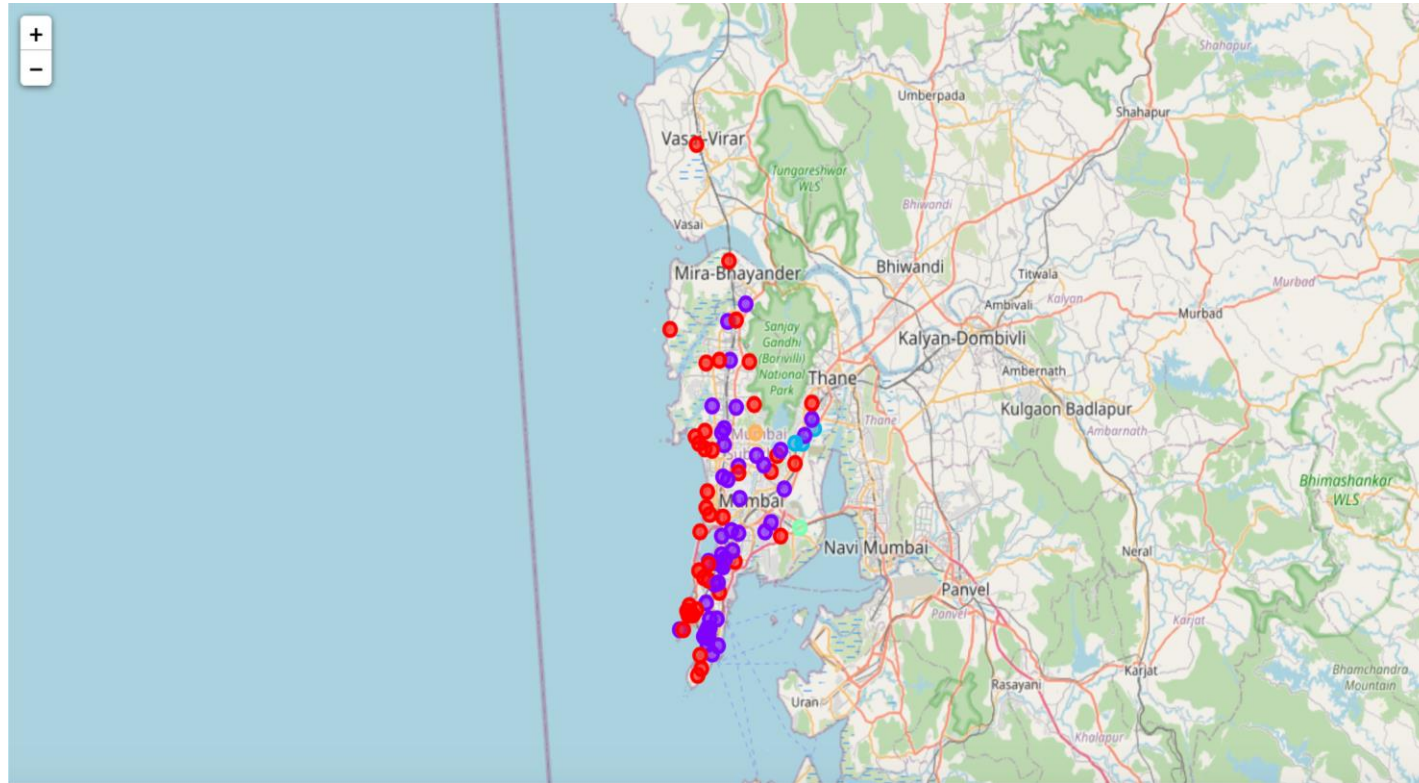

Figure 14: Visualizing the clustering of neighborhoods in Mumbai

# Discussion

- By analyzing the clusters, it is evident that neighborhoods in cluster 3, 4, and 5 are not well suited for a new restaurant since they contain a high degree of other venues like train station, bus station, fish market, gym and smoke shop
- Comparing clusters 1 and 2, we find that neighborhoods in cluster 1 contain a much higher degree of food joints
- Neighborhoods in cluster 2 contain many other venues like soccer field, flea market, smoke shop, gym, train station, dance studio and music store
- Thus, the most optimal neighborhoods for starting a restaurant are in cluster 1

# Discussion Continued

- Plotting final results using Folium library in python

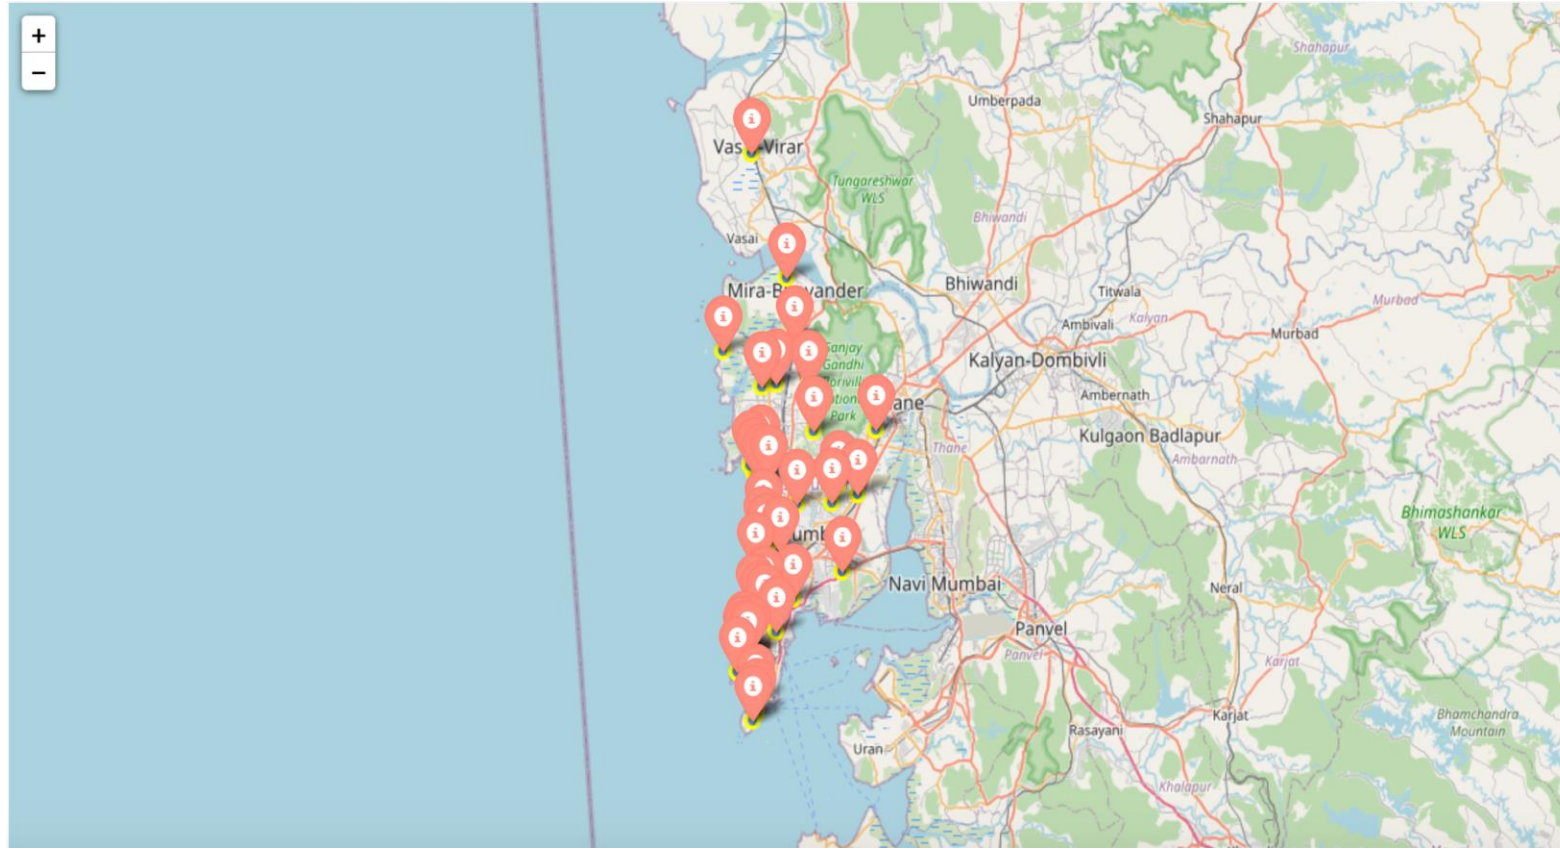

Figure 15: Neighborhoods in Mumbai that are most suited for starting a new restaurant (Cluster 1)

# Conclusion

- In this project, the neighborhoods in Mumbai, India have been successfully analyzed for determining which would be the best neighborhoods for opening a new restaurant
- Based on the analysis carried out, neighborhoods in cluster 1 are recommended as locations for the new restaurant
- The stakeholders and investors can further tune this by considering various other factors like transport, legal requirements, and costs associated which were out of the scope for this project and thus were not considered
